Note.—On an examination of this Account, it will be found that in some instances the quantity of Wheat entered for Home Consumption in a particular week, computed at the rate of Duty then in operation, will not produce a sum corresponding precisely with the amount of Duty which is stated to have been received in that week; the disagreement in such cases is ascribable to the postponement of entries, the abatement of Duty on quantities damaged, and other causes connected with the practical regulations of the Custom House.

* Previously to 1833, the Monthly Returns of the Importation and Consumption of Foreign and Colonial Corn were collected together, in annual periods, commencing on 1st January, and terminating on 31st December. From 1833, downwards, they have been made up, like the other Accounts of this department, in periods commencing on 6th January in each year, and terminating on 5th January in the year succeeding. This circumstance is necessary to be noted, inasmuch as it explains why the aggregate Imports and Consumption of the several years, from 1828 to 1832 inclusive, as exhibited in the present Statement, will be found to differ to a small extent from the quantities shown in other Accounts, which have been compiled, not, as in this case, from special Monthly Returns of the Corn Trade, but from the ordinary records of the general commerce of the country

† *Note.*—The Returns for 1841 will be liable to alteration (although not to any considerable extent) when the Accounts of that Year shall have been finally adjusted.
